Create an image of Funerary Mask of Tutankhamun, that was made in ancient Egypt in 1323 BCE. The mask must be made of high karat gold to represent the strength of gods and the eternal life of the sun god, Ra. The face should have serene features; this allows the spirit to recognize the body so it can return to it. On the forehead add a vulture and a cobra that is made from lapis lazuli, gold, and glass. These animals represent the two halves of Egypt, and this detail is included to show how the king is the person who brings both halves of Egypt together.

Funerary Mask of Tutankamun, 1323 BCE
